Yazan Aljammal

AI & Data Science Engineer | Computer Vision · Machine Learning · Embedded Systems

Amman, Jordan | yazanjim11@gmail.com | GitHub

Professional Summary

AI and Data Science graduate (B.Sc., Zarqa University, 2026) who builds real-time computer vision and machine learning applications in Python, OpenCV, MediaPipe, TensorFlow and PyTorch, and prototypes them on Arduino, Raspberry Pi and ESP32 hardware. Microsoft Azure AI-900 certified, with a Responsible AI badge. Brings practical operational experience in Arabic-language content moderation, sales and negotiation, event coordination and administrative data management, so combines technical depth with clear communication, ownership and attention to detail. Eager to contribute technical skills, learn modern engineering practices, and grow within a collaborative technology team.

Technical Skills

- **AI & Data Science:** Computer Vision, Machine Learning, Deep Learning, Natural Language Processing (NLP)
- **Programming & Libraries:** Python, Java, C++, NumPy, OpenCV, MediaPipe, TensorFlow, PyTorch
- **Hardware & IoT:** Arduino, Raspberry Pi, ESP32, embedded systems prototyping
- **Tools & Platforms:** Git, GitHub, Android Studio, SQLite, Power BI, Microsoft Azure
- **Professional Skills:** Content moderation, Arabic-language technical writing, client communication, negotiation, event coordination, data entry and record keeping

Selected Project

Real-Time Sign Language Translator | Python, OpenCV, MediaPipe | GitHub

- Built a computer vision application that detects hand landmarks from a live camera feed and translates gestures into text in real time
- Applied MediaPipe hand tracking and OpenCV video processing to support accessible communication for deaf and hard-of-hearing users

Professional Experience

Content Moderation Specialist

- Reviewed, analyzed and moderated live-stream content against platform policies and compliance standards
- Created technical reference guides and compliance datasets in Arabic to support consistent moderation decisions
- Applied analytical judgment and attention to detail to classify and escalate policy-sensitive content

Sales Professional

- Managed client communication and market negotiation to close deals and drive sales growth
- Built customer relationships and adapted pitches to client needs

Event Coordinator

- Planned and organized events, coordinating logistics, schedules and teams to deliver successful outcomes

Data Entry & Administrative Intern — Future Step Cultural & Training Center (مركز خطوة للمستقبل)

- Completed a field internship recording data accurately and maintaining system logs
- Provided day-to-day administrative support in a training center environment

Education

Bachelor of Science in Artificial Intelligence and Data Science | Zarqa University, Jordan | Graduated 2026

Certifications & Training

- **Microsoft Certified:** Azure AI Fundamentals (AI-900) and Responsible AI Badge
- **Cisco Networking Academy:** Python Essentials 1 & 2; Data Science Essentials with Python
- **Power BI Intensive Course:** Qafza Tech
- **Arduino Robotics & Embedded Systems:** Zarqa University
- **Intensive Python Programming Course (60 hours):** Tuned Applications

Languages

- **Arabic:** Native / Excellent
- **English:** Very Good

Career Objective

Seeking an entry-level AI, Data Science or Computer Vision role where I can apply my machine learning and programming knowledge, continue developing my skills, and combine my technical background with practical operational experience.
